## Job Description

---

Location: Qatar

Industry: Oil and Gas

**Application Email:** [jobs@emkanengineering.com](mailto:jobs@emkanengineering.com)

**Website:** [www.emkanengineering.com](http://www.emkanengineering.com)

### **Position: Production Manager**

#### **Qualifications:**

- PMP or equivalent certification.

#### **Experience:**

- Minimum 10 years of experience in the Oil and Gas industry.

#### **Responsibilities:**

- Oversee and manage production operations.
  - Develop and implement production plans and strategies.
  - Ensure compliance with safety and quality standards.
  - Monitor and optimize production processes to improve efficiency.
  - Lead and manage production teams.
- 

### **Position: Estimator**

#### **Experience:**

- Minimum 7 years of experience in the Oil and Gas industry.

#### **Responsibilities:**

- Prepare cost estimates and budgets for projects.
- Analyze project requirements and specifications.
- Collaborate with the project team to develop accurate forecasts.
- Provide insights to ensure cost-effective project execution.

### **Position: Workshop Manager (Senior)**

#### **Experience:**

- 15–20 years of experience in the Oil and Gas industry.

#### **Responsibilities:**

- Manage daily workshop operations, including equipment maintenance and repairs.
- Develop and enforce safety procedures in the workshop.
- Oversee team performance and ensure project deadlines are met.
- Coordinate with other departments to meet project requirements.

### **Position: Welding Engineer**

#### **Qualifications:**

- AWS Certified Welding Inspector (CWI) or equivalent certification.

#### **Experience:**

- Minimum 5 years of experience in the Oil and Gas industry.

#### **Responsibilities:**

- Inspect and ensure welding work meets quality and safety standards.
- Develop welding procedures and train team members.
- Oversee welding projects to ensure compliance with client specifications.
- Collaborate with engineers and quality teams to optimize welding processes.

### **Position: Project Control Manager**

#### **Experience:**

- 10–15 years of experience in the Oil and Gas industry.

#### **Responsibilities:**

- Manage project schedules, budgets, and performance metrics.
- Identify and mitigate project risks.
- Collaborate with project teams to ensure timely and efficient project delivery.
- Prepare detailed progress reports for stakeholders.

### **Position: QC Manager**

#### **Qualifications:**

- CQE, CQM certifications.

#### **Experience:**

- Minimum 7+ years of experience in the Oil and Gas industry.

#### **Responsibilities:**

- Implement and oversee quality control processes and standards.
- Lead quality assurance audits and inspections.
- Train staff on quality control standards and practices.
- Ensure compliance with regulatory and industry standards.

#### **How to Apply:**

Send your updated CV to [jobs@emkanengineering.com](mailto:jobs@emkanengineering.com).
